Mobile Storage System

Conventional System

ARCHIVER Mobile Storage System

Mobile Storage System X-2000

Filing systems and archives serve as the memory and backup facility for most organisations. Sound corporate decision-making and long term success depends on information readily available from the storage system.

Excellent storage performance requires a high degree of efficiency in storage systems that extends to all aspects of organisational requirements, regardless of whether it is for long term planning or day-to-day operations.

Mobile storage systems have been used in many sectors of commerce and industry, such as the following:

- Financial Institutions
- Hospitals
- Plants and Factories
- Radio and TV Stations
- Government Departments
- Computer Centres
- Commercial Offices
