

Tambour Door Cupboard

Ultra modern in concept and aesthetic in design, the Archiver Tambour Door Cupboard is one of the most sophisticated and versatile storage equipment for the office and can match and complement most modern office decor.

The sliding door is manufactured by one of the world's leading producers of plastic and is extruded from high strength, wear resistant thermo plastic. These doors have been tested in excess of 10,000 open and close cycles by the manufacturer and provides years of trouble free service.

ARCHIVER is a name synonymous with aesthetically and ergonomically designed office furniture created to match the interior finishing of most modern offices. All metallic parts are pre-treated with a rust resisting process before painting. During the painting process, epoxy powder paint is sprayed on all metallic components and then baked in an oven to a smooth scratch resistant finish.

Side Slider Cupboard

The different orientation of the Archiver S-800 system means that it can be put in spaces too narrow for traditional compactus systems.

The Archiver S-800 has been designed to cater to most space and filing requirements ranging from books, arch files and paper files to stationery and other items.
